HACKATHON

BARTERING NFTs

PROBLEM DESCRIPTION

Digital art and tweets are traded by transforming them into NFTs. These can be earned in any retail domain and can be used in other domains like games, fashion, travel or art.

Example:

Place an order for Rs 100 unlock 5 coins Place an order for Rs 500 unlock 30 coins.

This rule can be changed dynamically based on shopping behavior. This NFT can be in any digital platforms Voice, Video, Web 2.0 /3.0 or Metaverse. This can be earned in the Retail domain but can be used in any other domain. Games, fashion, travel or art and vice versa is also true.

Create and implement a NFT based rewards program in the Retail domain. The solution should include Earn and burn implementation that has to be done in the block chain.
